COWORKSATION®: Get video conferences rolling **The new mobile TV trolley from DURABLE**

An award winner before market launch: German Design Award 2022 in the category Excellent Product Design, Office Furniture

Iserlohn, 15.11.2021 According to a current study conducted this summer by Framery, 89% of European companies are expecting video conferences to increase by between 100 and 500%. And it's no big surprise: at least since the COVID-19 pandemic, new working styles have arrived in most companies. Staff can work in the office, from home or in alternative work spaces such as cafés or lounges and can communicate with each other via video calls. DURABLE, the Modern Work Expert, has picked up on the remote trend and has developed a contemporary solution for the flexible use of monitors and TV screens. COWORKSATION® is a mobile TV trolley made from high-quality materials and equipped with lots of practical details for technology and cable management. Thanks to its clear, functional design, it fits in all (working) environments. COWORKSATION® is available now from specialist retailers or at durable.de.

Cowork + Conversation = COWORKSATION®

A hybrid presentation in the meeting room in the morning, project planning in the cafeteria in the afternoon with colleagues from all over the world logging in and later an update video call in the office – it's all so simple with the new COWORKSATION®. This flexible media trolley is along for the ride and can transport all the necessary video equipment such as monitor, remote control, extension cable, mini PC, mouse and keyboard. All the cables are hidden inside the aluminium profile. That means that all devices and components are ready to go without any cables hanging down and causing trip hazards. COWORKSATION® is the ideal modern work device for anyone who wants to work flexibly wherever they want – for example in agile teams – and who also uses a screen for communicating and presenting.

Intelligent details

COWORKSATION® is equipped with a secure, height-adjustable mount for televisions that comply with the VESA standards of 75x75 to 200x200 mm and for monitors measuring between 19" and 43". Thanks to the robust handle and the four stable 75 mm rollers, the mobile media trolley is easy to move from

PRESS RELEASE

one place to another. Two brakes ensure that it remains in place when you need it to. Thanks to its clever construction, this flexible trolley doesn't take up much space when it's not in use. Narrow, vertically arranged compartments provide space for a mini PC and various IT and technology accessories.

Award winning new work design

Over the past few years, DURABLE has won over 100 prestigious awards for the high functionality and excellent design of its products. With its new media trolley, the German brand is once again demonstrating its great design skills. Despite being newly launched, COWORKSATION® has already been awarded the German Design Award 2022 in the category Excellent Product Design, Office Furniture
