DURABLE CAVOLINE® Box is the winner of the iF Design Award 2020

DURABLE's CAVOLINE® Box has won this year's iF DESIGN AWARD and is thus one of the winners of the world-renowned design label. The solution for modern cable management was awarded in the "Office" category.

CAVOLINE® was able to convince the 78-strong, independent and international jury of experts with its outstanding design. The CAVOLINE® box meets the highest standards of functionality and aesthetics. The box in excellent material quality is available in sizes S or L and offers sufficient space for a 3 or 5-pin multiple socket and superfluous cable lengths. This makes it an important tool for providing a clear overview and reducing tripping hazards. The dust-free storage of the plug connections can extend the service life of the electronic devices.

The stringent and yet functional design integrates perfectly into the modern office or home office. The high-quality surface finish in grey or anthracite gives the material a noble look and creates a stylish ambience. Clever details such as a charging dot on the top, extra soft components to protect the cables at the inlets and outlets as well as the flame-retardant material complete the well thought-out concept. All CAVOLINE® boxes are manufactured in Germany. Made in Germany by DURABLE guarantees high manufacturing quality.
