### Award-winning IT accessories: Double win for DURABLE at the 2021 Iconic Awards

**DURABLE monitor mounts and CAVOLINE® cable management system victorious in the 'Office and Workplace' category.**

**Iserlohn, Germany, 07/12/2020:** "Exceptional products" with "outstanding design quality": Not one, but two series from DURABLE's IT accessories range impressed the renowned international jury at the Iconic Awards. Both the German brand's functional monitor mounts and its CAVOLINE® cable management system were among the 2021 winners in the 'Office and Workplace' category. Both series have already received several awards, including the German Design Award and the Red Dot Design Award. "Design always plays a big part when we create our DURABLE products. That is why we are so delighted that the respected experts of the Iconic Awards jury are honouring our work," explains Martina Heiland, PR Manager at DURABLE. "For us, design is never an end in itself; it is always inextricably linked with a high level of functionality. That allows us to offer particularly efficient, ergonomic and safe solutions for a wide range of working environments."

#### Good looks

The functional design elements of the award-winning DURABLE monitor mounts make working with a screen more ergonomic. The elegant, infinitely adjustable mechanical elements allow each user to adjust the height, angle and distance of the monitor to fit their individual needs. Finding the correct (visual) distance to the monitor is essential for eye health and an ergonomic posture, both of which are needed to work efficiently.

The German Institute for Health and Ergonomics (IGR) has certified the positive impact of DURABLE monitor mounts on health, well-being and performance with its 'Ergonomic Product' seal.

## PRESS RELEASE

### Into the box with you!

Put an end to cable clutter! CAVOLINE® tames cables and power strips, helping you route them neatly. The cable management box is available in grey and anthracite, with the different sizes offering sufficient space for either 3 or 5 socket power strips. The premium design is enhanced by several clever details such as a circular cable opening, soft components to protect the cables at the cable entry points and outlets, and fire-retardant materials.
