

PRESS RELEASE

Usable on both sides: The new information floor stands from DURABLE

DURABLE INFO STAND BASIC: Display information sheets on both sides // For A4 and A3 info sheets // Switch easily between portrait and landscape layout // Removable frame, also available in signal colours

Iserlohn, xx.11.2021 Warnings, notifications, directions and other important information... If you've ever used classic info stands in the middle of a room, you may have found that you can only use one side to display your information. DURABLE is now offering a solution in its affordable basic segment. The new DURABLE INFO STAND BASIC is a flexible all-rounder: it can be read from both sides and rotated between portrait and landscape. The INFOSTAND BASIC is available in two sizes for either A4 insert sheets or A3. The stand is available from specialist distributors and at durable.de.

Quick and easy to set up and position

The INFOSTAND BASIC is ready to use in a matter of minutes. The included info-frame DURAFRAME® MAGNETIC is attached to the front and back of the metal plate. This plate is then inserted into the solid floor stand in either portrait or landscape format. You can easily switch between these two formats whenever you want. Using the INFOSTAND BASIC couldn't be easier: just open the info-frame, insert the info sheet, close it, and that's it!

The floor stand also provides the usual advantages of the DURABLE floor sign range: modern,

functional design as well as a high degree of stability thanks to the high-quality support profile and the heavy floor plate, which is cushioned by four non-slip rubber feet.

Your choice of frames

Included with the stand and the metal plate are two black DURAFRAME® magnetic frames. These frames can also be reordered in various shades including elegant silver and bright warning colours. Safety instructions can be emphasised by the use of vivid frames.

By the way: at duraprint.de, DURABLE provides free safety signage templates to download.
