

## **VERSATILE: DURABLE TABLET HOLDER RANGE NOW ALSO INCLUDES PIVOTING WALL-MOUNTED MODEL**

**Hall 3.0, stand B81 // DURABLE TABLET HOLDER WALL PRO // pivots up to 88° // Available from end of January 2019**

**Iserlohn/Frankfurt a. M., 26/01/2019:** Tablets have found their way into working environments in almost every industry, and are used for other purposes in addition to mobile computing, for example as electronic cash registers, interactive restaurant menus, mobile patient files or digital learning aids. The mobile device has also firmly established itself in private use: 47.5% of all German households have a tablet (destatis 2018). No matter where and how the devices are used, DURABLE offers the perfect solutions with the TABLET HOLDER range for more efficiency, better ergonomics and enhanced safety in use.

At Paperworld 2019, the expert on modern work will be presenting a new model for wall-mounting. The wall-mounted TABLET HOLDER WALL PRO pivots from 0° to 88° – ideal for when you have to enter data in addition to presenting content, for example in production and logistics, the hotel and hospitality industry, administrative departments and companies. The holder is also suitable for a wide range of private uses, such as for interactive cook book apps. TABLET HOLDER WALL PRO is available from the end of January 2019.

### **Functional equipment**

The new holder is suitable for all tablet sizes from 7" to 13". The mobile devices can be easily repositioned, either horizontally or vertically, with one hand. TABLET HOLDER WALL PRO can be rotated 360° and the angles are infinitely adjustable. It features anti-theft protection and a smart cable management system.

### **Flexible system**

With the new wall-mounted model, DURABLE is creating new and efficient ways to use tablets. The TABLET HOLDER range now boasts six different models with innovative features.

- **TABLE:** The table stand is fitted with 360° rotating holder, allowing the tablet to be used either horizontally or vertically – ideal for desks and conference rooms.
- **TABLE CLAMP:** The holder with a flexible support arm can be fastened directly to tables, desks or other work surfaces, and rotated in various directions. That saves space while maximising flexibility.
- **FLOOR:** The floor-mounted stand offers integrated cable management. With its sophisticated look and outstanding functionality, it is particularly well suited to reception areas, event rooms, trade fairs and at the point of sale (PoS).
- **WALL:** The wall-mounted holder acts as a premium-quality presentation carrier at the information point or point of sale.
- **WALL ARM:** With the pivoting wall holder, DURABLE has created a flexible solution for multiple workplaces and conference rooms.
- **WALL PRO:** When combined with a tablet, the rotating wall mount with adjustable angles is ideal as an input terminal.

The design of all products features clear lines and a premium metal surface with a matte sheen, making them ideal for every environment. Charging cables and other cables for the tablet PC can be discreetly routed and concealed in a cable channel depending on the model. All TABLET HOLDERS are also equipped with theft protection.
